Claimant suffered and continues to suffer emotional and mental distress, sleeplessness, anxiety, and depression because of the fire.	\$ -	\$ -	\$ -	\$ -	\$ -	-	\$ -	\$ -

	James	\$	-	\$	-	\$	-	Smoke and ash inhalation from fire and aftermath caused ongoing and chronic respiratory and allergy problems, fatigue, and stress. Significant emotional and mental distress and anxiety caused by the fire, exposure, and aftermath. Working out living and working arrangements was hectic. The smoke was very heavy and caused my spouse and I breathing issues. We took some time off of work and we headed to Idaho hoping the air quality would be better. On the way to Idaho, we struck a whole herd of male deer with our truck. We stayed in Idaho for a week or so. When we returned to Springfield, we made arrangements to stay in an RV Park. The stress in the weeks and months after the fire was intense. Due to the stress of trying to deal with all of the fire and still conduct my real estate business, I decided to turn in my real estate license and terminate my real estate practice. In conclusion, due to the stress of the fire and the aftermath I feel emotionally worn out and extremely tired. I no longer have my real estate business. My allergies and breathing are worse than they have ever been."	\$	-	\$	-	\$	-	\$	-	750,000.00	\$	-	\$	-	\$	-	
Canfield	Shemie	\$	-	\$	-	\$	-	Smoke and ash inhalation from fire and aftermath caused ongoing and chronic respiratory and allergy problems, fatigue, and stress. Significant emotional and mental distress and anxiety caused by the fire, exposure, and aftermath. "The first week after the fire was difficult because of the stress of not knowing where to go or how to make living arrangements. The smoke was very heavy and causing my spouse and I breathing issues. In Kennewick, Washington I was having trouble breathing and was admitted to the hospital for double pneumonia. All of my hair fell out and the doctors said this was probably caused by all of the stress which I went through. My lungs which prior to the fire and COVID had been very healthy have suffered damage. In conclusion, I believe most of my physical issues were caused by the aftermath of this fire. Because we were isolated prior to the fire, and I had been working from home, I do not believe I would have contacted COVID at that time if I did not have to physically go to work. The extreme stress and heavy smoke contributed to my issues. I spend more time resting and sleeping as emotionally I feel worn out and do not have the drive and energy that I had prior to the fire."	\$	-	\$	-	\$	-	\$	-	500,000.00	\$	-	\$	-	\$	-

Henson	Lisa	\$	489,880.00	Included in real property damages				Smoke and ash inhalation from fire caused respiratory distress, including exacerbation of asthma, increased symptoms and relapse from MS, sore throat, lung, eye, and sinus problems, triggered a substantially increased frequency of migraine headaches. Claimant suffered and continues to suffer emotional and mental distress, sleeplessness, anxiety, abnormal heart rhythms, and depression from injuries and fire. "I have asthma and the smoke exacerbated it. In addition, the significant stress of this entire ordeal has exacerbated my diagnosis of MS. I have had to go on stronger medications." "I have on hand meds for migraines. I increased ibuprofen and supplementation for lung support." "I have migraine and smoke is one of the biggest triggers, so I was sent into a phase of daily migraine for months. In addition to sinus issues, throat, lung eye and sinus problems." "I keep medication on hand for migraines, sinus and asthma over the counter remedies for sinus, throat issues as well as eye drops. I continue to have emonst, and physical support through a therapist (bi monthly) acupuncture." "Significant/severe depression, grief, anxiety, inability to sleep, I have nightmares, and heart palpitations." "There's been a significant worsening in my relapsing remitting MS, worsening of migraine. As a disability recipient I struggled before. Now, I'm worried I will never regain control of my life, that I'll never be able to get my home environment stable for me again. I'm angry & beyond annoyed thinking the fire could have been prevented. There was so much life lost (twelve, thirteen, husband's peace and comfort gone)." "Finding the corpses of the creatures I cared for was brutal and haunts me to this day. I am angry and fearful that the comfort of a financial cushion I struggled to created was incinerated in a few hours. Due to the fire, my disability leaves me unable to recede the life I enjoyed for 25 years. It's a dual reality for me." "I'll never be the same. I escaped surrounded by flames. With the exception of ONE picture of my MOTHER and a few pieces of jewelry I lost EVERYTHING; long saved cash, priceless art, family heirlooms are all gone. I am anxious at every turn, fearful, easily startled, and depressed. I have been on disability for over twelve years and will have more difficulty returning to the status quo, if at all. I have lost the use my land, and beloved garden. I fear I will never be able to enjoy the wildlife that was paramount to the quality of my life!"	\$	-	\$	-	\$	-	\$	-	500,000.00		\$	-	\$	-	\$	-
